Katie,

Some notes about the submission that I meant to send to you earlier, but I have been out sick the last two days:

- Cook Information – We included the actual cook information for the last 2 months. We felt this was the most accurate way to show you the temperatures that are used to cook the glass.
- Waste Analysis – In your written note you reference 2010 analysis, which I believe was a result of my mentioning that we had retested all of our waste streams when we switched to Waste Management. This was not accurate, so instead we included our most recent test results for each waste stream. We performed new testing for our batch baghouse fines, as we had difficulty locating a recent test that included hazardous materials.
- Pink Frit MSDS – We are working with the supplier to get an updated MSDS.

Please let me know if you have any questions.

Kyle

Hi Kyle,

Just wanted to confirm I received your information. I'll look it through and let you know if there are any outstanding items. Thank you.

I am trying to find out when we are open for that type of delivery. I will be in the office until about 4:30, so I could meet him if he comes before then. I'll still try to track down our official people in case that is later.

Katie,

I'm going to have one of our Engineers bring the documents by. He lives in West Seattle so it is on his way home, more or less.

What time are your offices open until?

Kyle

Thanks for getting it all ready. I understand your concern. If you don't want to mail you always have the option to hand deliver the documents to our office (which many people do). Neither Zach nor I will have time to come get them. It is up to you what ever method you are most comfortable with.

Katie,

I have the documents ready, it's about a ream of paper.

I also have some information on a flash drive, and as I was encrypting that information, it struck me that we were sending in physical form the most sensitive information.

Is there any way to submit this paper without using the mail? Any chance Zach wants to make a trip to Woodinville?

Thanks,
Kyle
